

Therapy Spaces

174 Merton High Street, London SW19 1AY

Induction

1. Front Door:

A key deposit of £20 is payable. You are responsible for its safe keeping; please do not label it with the address or name of the premises, and in the event of loss ensure that the branch supervisor is informed as soon as possible. The front door is on a latch and must be kept locked, and you should be careful to check that the latch has engaged when leaving the premises.

2. Intercom:

The door bell has 5 buttons - one corresponding to each room that connects to a handset on the wall. Please be sure to let your clients know which room you are in so that they only ring that bell and avoid disturbing other sessions. Patients should be escorted to and from the front door to ensure that the door is properly closed behind them as they arrive and leave.

3. Fire Safety:

Please familiarise yourself with the Emergency Action Plan which is located in the corridor, next to the fire extinguisher. You are responsible for clients while they are visiting the premises and must ensure their safe evacuation.

4. First Aid

A first aid kit and accident book are kept in the reception area. Please notify the management team of any incidents.

5. Ventilation and Heating:

The room ventilation system does not recirculate air and while this keeps rooms COVID-secure it is not very environmentally friendly; it therefore works using a motion sensor in the corridor which keeps it on for an hour after the last detected movement. The underfloor heating is controlled by a thermostat in each room - please remember to turn these off if there are no bookings after yours.

6. Rubbish Bins and Cleaning:

Please ensure that you leave facilities as you would wish to find them; where necessary use the clinical wipes provided to wipe down surfaces. Empty room bins after either into the large bin in the WC, or if this is full the bin in the store room (Code: C2467Y). Any maintenance issues or breakages should be reported to the management team. Finally, when vacating a room please switch off lights, turn down the thermostat, and leave the door open so that we can see the room is not occupied.

7. Clinical Waste and Sharps Disposal:

Please do not use the normal bins for clinical waste or sharps. If you wish to keep a sharps bin then please keep this labelled with your name in one of the cupboards, preferably in a storage box as in 9. below.

8. Personal Safety:

You are responsible for your own personal safety when with clients. Be mindful of risks and if necessary arrange a buddy call or text after sessions, and consider installing an alert app or carrying a personal alarm. Mitigate risk by ensuring that you are not alone in the premises when dealing with clients who you think might present a risk to you. Each room is equipped with a fire alarm call button and in the event of an incident this can be used to sound an alarm that will alert other therapist on site, however the alarm is not externally monitored.

9. Storage:

We have units in the rooms, and a storage cupboard which is protected with a keypad that you can use if you want to leave equipment on the premises – the code for this is C2467Y. Please put all items in a storage box marked with your name. Please note that this should not be considered as secure storage and Therapy Spaces does not take any responsibility for items stored there.

10. Communications:

We use WhatsApp to communicate with each other – please join the group by clicking here: <https://chat.whatsapp.com/C4BpPWq1uO8KGsw9ECkG1m>

11. WiFi:

The password for our wireless network is **Wellness2020**. We would ask you to use the network in a professional manner, and would request that you do not share this password with patients or other third parties as this will present an increased security risk to users of the network.

12. CCTV:

CCTV operates within communal areas of the premises, including entrances, corridors, and storage areas. Cameras are in place for security, safety, and to help investigate any incidents, including the appropriate use of shared facilities such as storage areas, bins, and clinical waste. CCTV is not installed in therapy rooms, WC facilities, or any private areas, and is not used to monitor clinical work or sessions. Footage is recorded as video only (no audio), retained for 30 days, and accessed only where necessary. By using the premises, you acknowledge that CCTV operates in these shared areas.

13. Rooms are charged at the following rates:

	Rooms 1-3 (Manual Therapy)	Rooms 4, 5 (Talking Therapy)
Ad-Hoc Use, per hour	£16.00	£15.00
4 Hour Block	£55.00	£50.00
